

Ideas for Solutions

Documentary Film of the Month – April

Organized by Dr. Iyas Salim, GRM (Advance Doctoral Program in Global Resource Management)

The World In 2050 The Real Future Of Earth

Date: Wednesday 25 April 2018

Time: 17:30 P.M.

Venue: SK 118, Shikokan, Karasuma Campus, Doshisha University

***No Reservation Required**

Theme: The World In 2050: The Real Future Of Earth (A 2018-Documentary Film,38 Minutes)

Can you imagine our world in 2050? By mid-century there will likely be 9 billion people on the planet, consuming ever more resources and leading ever more technologically complex lives. What will our cities be like? How will we eat in the future of Earth? Will global warming trigger catastrophic changes, or will we be able to engineer our way out of the world climate crisis? The World in 2050 explores many of these questions in the search for better understanding our future as a species of this world.

The Storyline of the Film (Content)

This documentary film looks at the predictions and promises being made about the future of the planet over the next few decades and explores some of the solutions being put forward to tackle the biggest issues. “What we've seen is that the world of 2050 won't look drastically different from the world today but the challenges of a growing population, increased energy demand, real solutions, its innovations like those we've just seen, that will be critical and charting our path to the world of 2050.”

You are welcome and free to join watching the documentary film. We will have free talk and discussion afterwards about the film and related issues and views.
