

Documentary Film of the Month - March

From the Indian Subcontinent to the Middle East: Partition, Borders, Conflicts and Legacies of Empire

This event is going to feature a short film, followed with speeches by two guest speakers. Title of the 25-minutes film is "Partition: Borders of Blood," about the highly volatile region of Kashmir, disputed by two nuclear powers. The film examines the troubled legacy of the historical event that shaped the Indian subcontinent which was divided by the British imperial rulers into two nation states, India and Pakistan 71 years ago. In Palestine, the British Empire left a legacy of the disposition of the Palestinian people of their homeland in 1948 as a result of the creation of the state of Israel. The two guest speakers will talk about the persisting two conflicts and discuss how can we alleviate the suffering of ordinary people and tackle the prospect for a resolution.
