This documentary film investigates the rise of the anti-5G movement and the spread of wild conspiracy theories tying the COVID-19 pandemic to the 5G rollout plan.

反5Gデモ、新型コロナウイルスの蔓延と5Gとの関係性を検証します。

The Storyline of the Film (Content)

Activists claiming 5G is an invisible and potentially deadly health hazard, blame the radiation emitted by the technology for a range of long-term health problems. They have demanded an immediate end to the current rollout, protesting in the streets even amidst the threat of the COVID-19 pandemic. The film investigates these claims, exploring how 5G technology really works and examining the scientific studies undertaken into whether it is in fact a threat to our health.
